

What is claimed is:

Added a7

~~1. A drawer for use in a dispensing cabinet, comprising:~~

rust ↗
Cloud 312 ↗
a tray carried by a slider;

an insert approximately the length of said tray, said insert carried by said tray and defining the volume of the drawer;

a lockable lid carried by said insert; and

a release mechanism for connecting said insert to said tray.

2. A combination, comprising:

a tray drivable between an open position and a closed position with respect to a slider;

an insert carried by said tray, said insert defining individual compartments each having a lockable lid, said insert approximately the length of said tray and defining the volume of the drawer;

a release mechanism for connecting said insert to said tray;

a self-locking worm gear for driving said tray; and

a clutch positioned between said worm gear and said tray.

700 ↗ (3.)

A dispensing cabinet, comprising:

an input device;

an output device;

a control computer connected to said input and said output devices;

a cabinet carrying a plurality of drawers, at least one of said drawers being a unit-dose dispensing drawer capable of dispensing a unit-dose, said unit dose dispensing drawer comprised of a plurality of individual drawers each individual drawer comprising:

a tray drivable between an open position and a closed position with respect to a slider;

an insert carried by said tray, said insert defining individual compartments each having a lockable lid, said insert approximately the length of said tray and defining the volume of the drawer;

a release mechanism for connecting said insert to said tray;

a motor;

a self-locking worm gear responsive to said motor for driving said tray; and
a clutch positioned between said worm gear and said tray.

4. A method of restocking a unit dose drawer of a medication dispensing cabinet, comprising:
 - releasing a first insert that defines the volume of an individual drawer from a tray;
 - connecting a filled insert to the tray from which the first insert has been removed; and
 - unlocking the lid of the filled insert.
5. The method of claim 4 additionally comprising:
 - delivering the first insert to a storage location for filling;
 - filling the first insert and locking the lid thereof; and
 - delivering the filled first insert to a medication dispensing cabinet.
